LOGAN, April 12.—For the past three or four months the Boosters' club has been working quietly on the matter of having the Short Eine build a cut-off between this city and Cache Junction. When the loop was extended around the south end of the valley it was thought to be the ulbimate intention of the railroad to send all Logan traffic around that way, and the cut-off proposition was immediately launched. All the towns north of Logan, of course favor this cut-off which would place them several miles nearer the outside world than they now are. The plan proposed is to have a line built diagonally across the valley to the junction from this city. The surveyors are dally expected,
